

# New Tallon Mounting Solutions and GPS Enhancement for tablet and iOS devices

**TALLON SYSTEMS**, who produce elegant mounting systems for just about everything from iPads to Cup holders, has recently released a new Mini Socket and USB Mount that opens up numerous new options for aviators and for mariners utilising iOS devices for navigation and communications support in the cockpit. The new Mini Socket is only 25 mm wide and utilises Tallon's patented flush cantilever technology for mounting accessories. Once attached, the Mini Socket is as strong as the coaming or dash it is fitted into. Tallon has also launched a 5.5v USB 2A socket – meaning everything from iPads and tablets to iPhones and navigation devices can be mounted securely and cleanly and charged at the same time.

Simultaneously, the company has teamed with award-winning US GPS manufacturer Bad Elf to offer Bad Elf's GPS Pro compact GPS receiver with a Tallon mounting solution for easy use with iOS devices in aircraft, boats, and vehicles. The GPS Pro is a water resistant, handheld Apple-approved accessory that uses Bluetooth to wirelessly connect up to five users of an iPod touch, iPhone or iPad to share real-time, direct satellite GPS data for display on digital charts and a wide range of compatible aviation, marine and vehicle apps via satellite – anywhere in the world.

The Bad Elf GPS does not rely on cell tower assistance to achieve a lock or to determine position. Instead, the unit includes a high performance satellite receiver and antenna that receive data directly from GPS satellites. Locking on to up to 15 satellites, a Bad Elf unit supplies GPS data up to 10 times a second that can be accurate to within 2.5 meters - allowing users to improve their GPS lock beyond cell phone coverage areas. Bad Elf GPS enables out of range or non-3G hand held devices and is a significant enhancement on the performance of the standard GPS sets supplied with most consumer electronic devices.

Wanaka based Tallon Systems first shot to prominence in 2007 after scooping a prestigious Innovation Award at the International Boat Builders Exhibition in Miami, Florida. In 2009 Tallon founder, Peter Marshall, won the Ernst and Young New Zealand Master Entrepreneur award.

Tallon gained further recognition in 2011, receiving a Design Award from General Motors Vegas for the Most Innovative Chevrolet Accessory at the SEMA Show.

## Special Pro Pack Bundle Offer

The Tallon GPS Pro pack bundles 1 x Mini Socket mount, 1 x USB Socket and an

iPad Mini or iPhone holder along with the Bad Elf GPS Pro. The entire pack costs just NZ\$395 incl. GST.

## For more information

For more information see the advertisement on this page or phone Tallon on 0800 825566. [www.tallonsystems.com](http://www.tallonsystems.com)

## Secure Mounts & Pro GPS For Your iOS Devices!

“Tallon's revolutionary new Mini Sockets mount and power electronic devices safely and cleanly in seconds. Our sockets attach quickly and require no specialist tools or certification...”

The Tallon Socket Mount secures electronic devices and smartphones without reliance on suction or expensive modifications, eliminating risk and expense.

The Tallon USB Socket converts a 12/24V input into USB 2A 5V output to keep power your iOS devices.

Then pair Tallon's mounting system with the award-winning Bad Elf® GPS Pro to turn up to 5 iOS devices at a time into fully enriched pro navigation platforms with data and waypoint logging. So you, your crew and passengers can follow the trip at the same time. Now that's smart!
